## Senior Software Engineer | Systems Architect | Educator

Technology leader with 21+ years of experience in full-stack development, systems architecture, and database administration. Proven success in delivering enterprise software solutions, reducing costs through cloud adoption, and leading cross-functional teams. Adept at mentoring developers, teaching at the college level, and aligning technical outcomes with organizational goals. Active participant in the W3C ARIA and Assistive Technologies Community Group, advancing accessibility standards for inclusive software development.

## Core Competencies

- Reading the manuals: Efficiently use documentation to maintain and improve existing integrated systems.
- Enjoy working with technical and non-technical stakeholders.
- Own responsibility for achieving goals.
- Programming & Frameworks: TypeScript, Java, C/C++, Python, Angular, Node, Django
- Cloud & DevOps: AWS, Git, Docker, VMware, VirtualBox
- Databases: PostgreSQL, MySQL, SQL Server, MongoDB
- Web & API Development: REST, JSON/XML, Bootstrap, AJAX, jQuery
- Systems & Tools: Linux, Windows, macOS, Apache, Tomcat, Eclipse, VSCode
- Leadership & Practices: Agile, Project Management, Unit/Integration Testing, Accessibility Standards (W3C/ARIA)

## Professional Experience

### Independent Contractor – Portland, OR

Dec 2019 – Present

- Designed and implemented multi-language support for enterprise Angular/Node.js applications using AWS, Transloco, and Lokalise.
- Built a CLI and REST-based billing and invoicing system integrating Postgres and Apache; automated data imports and generated interactive charts for expert witness presentations.
- Developed custom utilities to streamline and automate repetitive development tasks.

### Computer Science Instructor – Portland Community College, Portland, OR

Sep 2014 – Present

- Teach courses in UNIX/Linux, C++, Python, and Game Development to diverse student populations.
- Modernized curriculum and online content to align with W3C Web Content Accessibility Guidelines (WCAG).
- Participant in the W3C ARIA and Assistive Technologies Community Group, contributing to international accessibility standards.

### **Technology Director, Learner Web – PSU Applied Linguistics, Portland, OR**

Oct 2012 – 2019

- Directed a development team of graduate researchers to deliver Learner Web platform serving 70,000+ users across 150 partner organizations.
- Migrated infrastructure to VMware vSphere, reducing hosting costs by 30% annually and eliminating hardware expenses.
- Coordinated with vendors and institutional IT to ensure security, stability, and scalability across multiple Microsoft and Linux stack projects.

### **Consultant – PSU Center for Public Service, Portland, OR**

Jun 2015 – Dec 2019

- Transitioned outsourced TECC (Total Employee Compensation Cost) project to in-house system built with PHP, Drupal, and MySQL.
- Enabled municipalities to upload and analyze compensation data, improving transparency and comparative analysis across cities.

### **Consultant – Transflection LLC, Portland, OR**

Jun 2016 – Dec 2016

- Built a proprietary Raspberry Pi/Node.js application for targeted advertisement delivery in public spaces.

## **Education**

Portland State University – Portland, OR

- M.S. Computer Science (2009)
- B.S. Computer Science (2006)
